ABOUT US

Zealotech Solution (ZS) is an IT solutions provider based in Kuala Lumpur, Malaysia and Singapore. Founded and driven by a group of engineers with more than 25 years of experience in the information technology field, ZS aims to provide cutting edge IT solutions to small and big businesses alike. We understand the operations of small and big businesses because our engineers started from the very basic of IT management before venturing into the most complex infrastructure that small and big companies appreciate. On top of that, we are users of our own solutions as well so we know what we do inside out.

In every client partnership, ZS strives to deliver the latest integrated solutions that meet industry standards and propel our clients to achieve their business objectives. At the end of the day, the technology implemented should run the business – to deliver dollars and sense.

At ZS, Zealos (ZS talents) are committed to deliver results via the IT solutions implementations from day one itself. With that, we align our visions with our clients from the beginning to ensure that we start right and do the right things for our clients, even if it means having to go the extra miles to achieve our clients' goals. In short, client's success is our success.

OUR
BUSINESS
FUNDAMENTALS

We believe that a healthy and progressive working relationship starts by treating our clients as business partners who have entrusted us with valuable resources. With that, we practise the following fundamentals in our business conducts to achieve win-win situations for both our clients and ZS:

Endless Exploration of New Technology

The fun and excitement of technology lies in its endless progression and improvements. Zealos are driven to explore the vast new technology to ensure that clients get the most updated solutions that work best for them.

Achieve Greatest Possibility

We love to be at the forefront of the industry. Continuous improvements in our solutions become our mantra for the betterment of the industry and the KPIs of our clients.

Shared Success with Our Clients

Lastly, if clients allow, ZS would love to share the success with our clients because we take pride in our client's success. After all, we put in a lot of effort in making sure the projects deliver results that clients want.

OUR
BUSINESS
FUNDAMENTALS

Rest assured that besides these values that we hold on to, we ensure professionalism in our work by testing every proposed solution and technology in certified environment. We are professional solution integrators on top of our professional ethics.

The ZS team is dedicated in the following specialisation to ensure best service delivery for our clients:
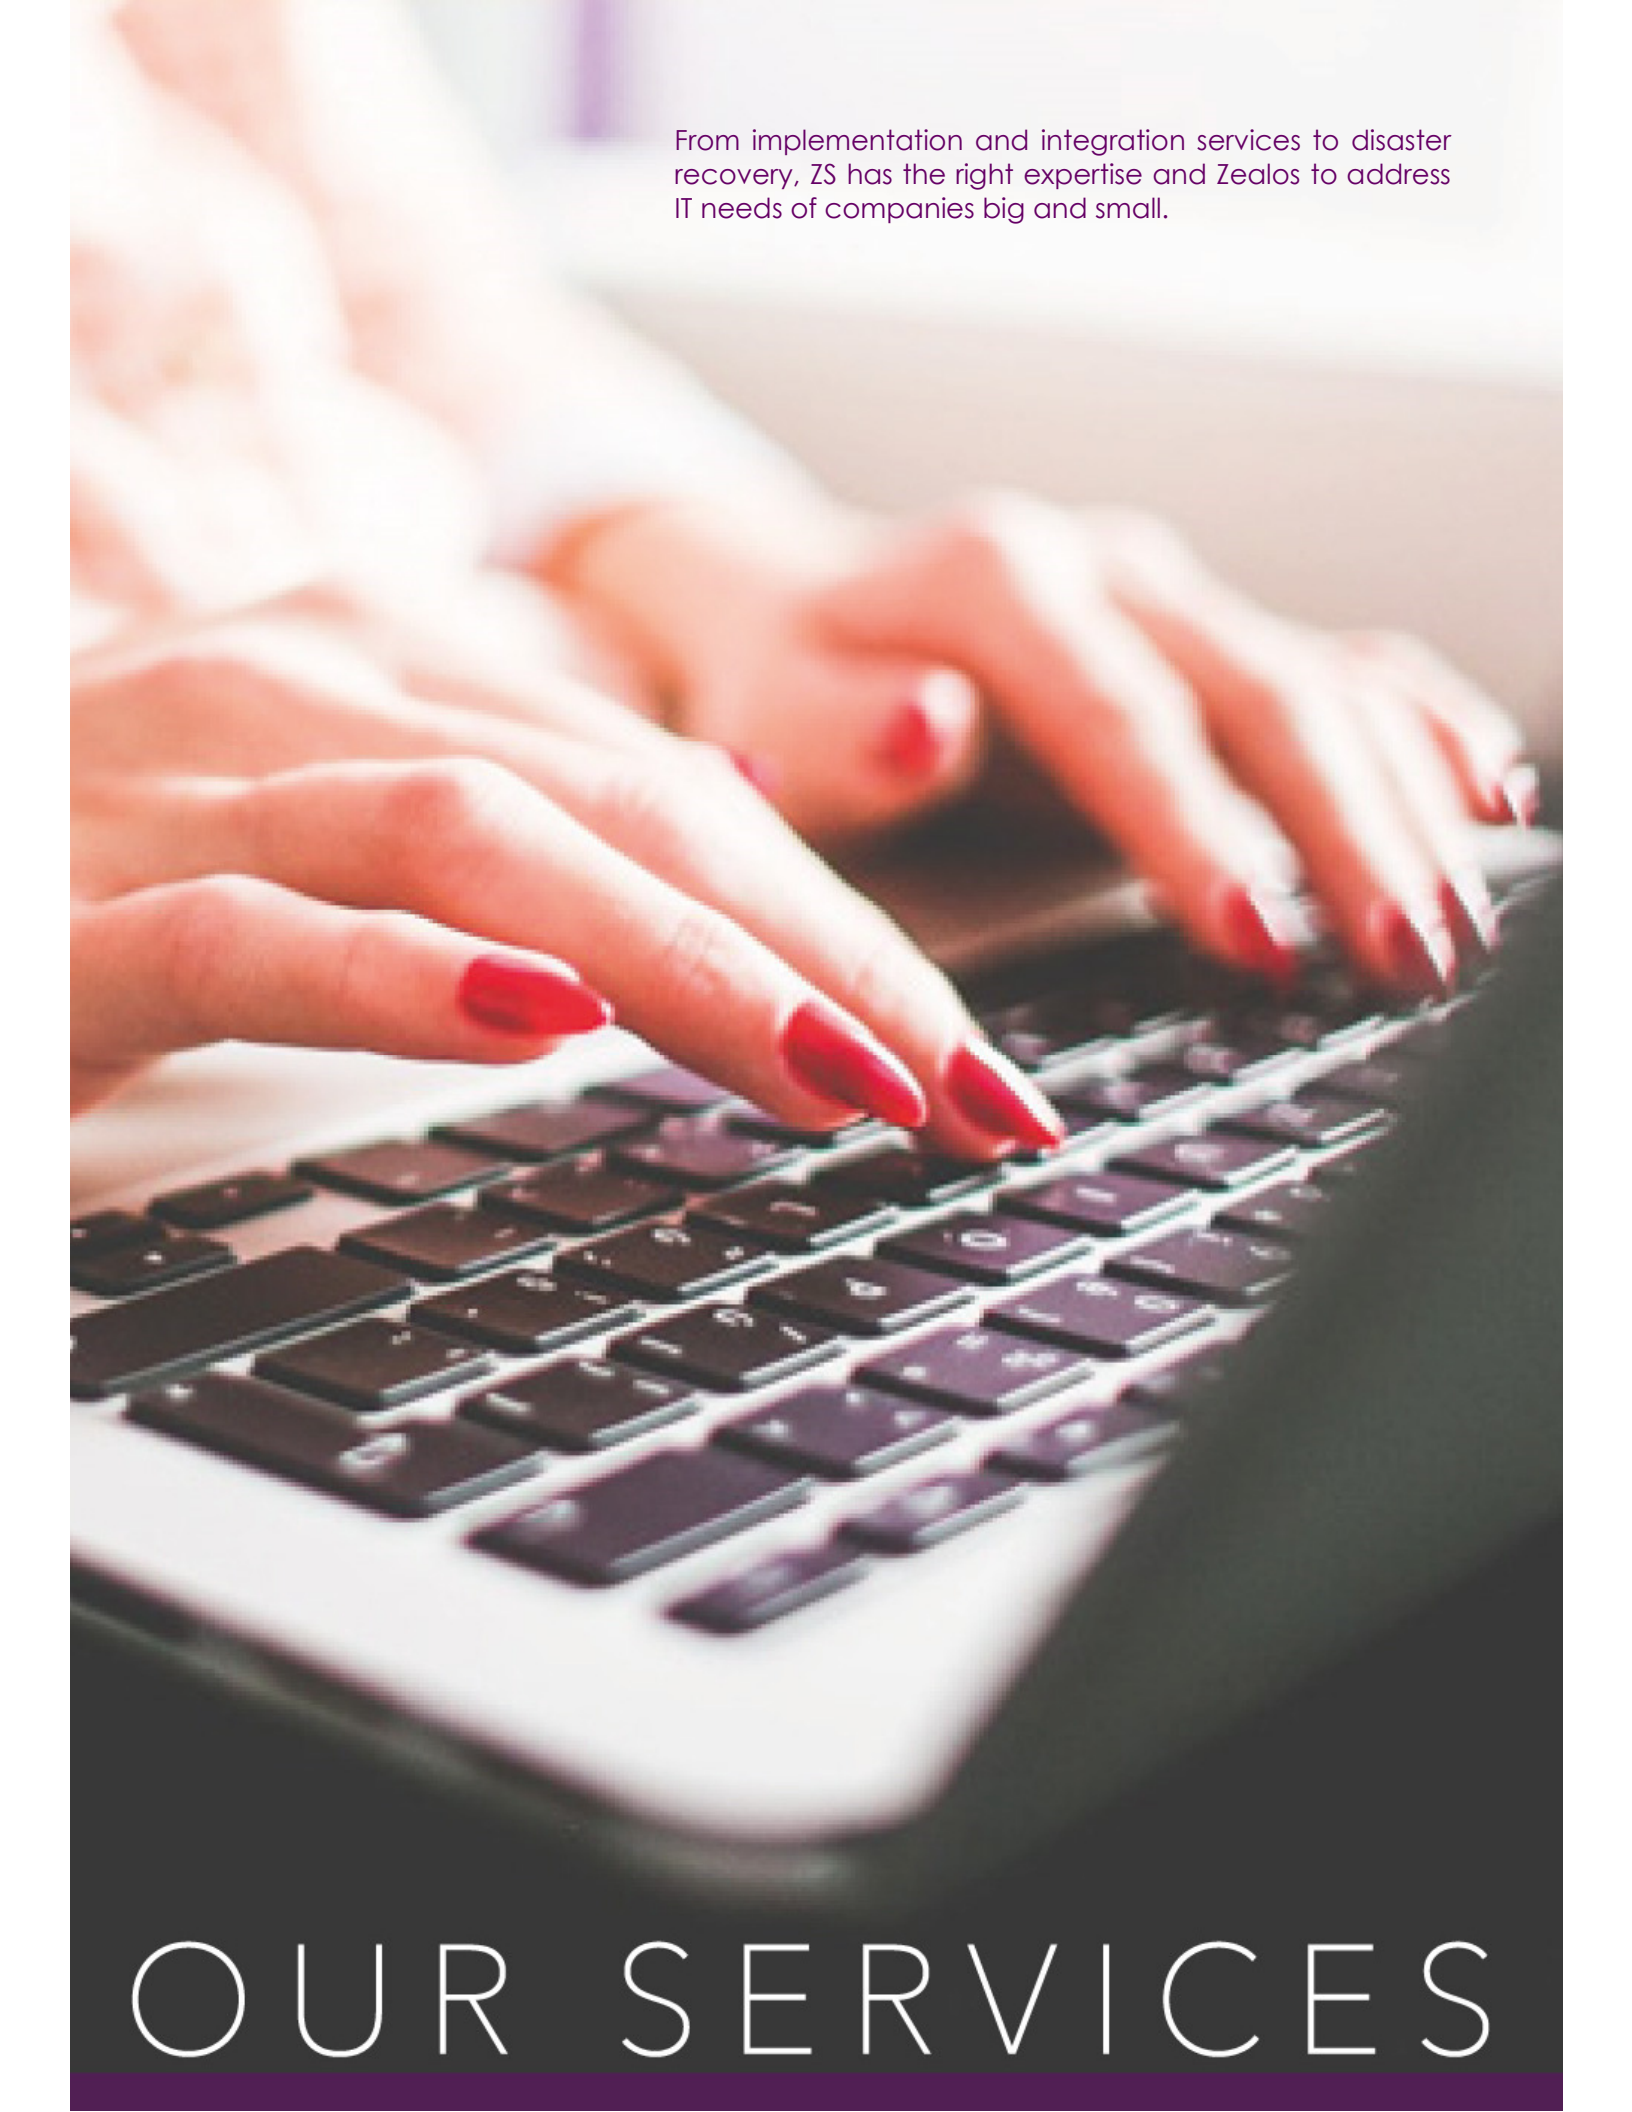

Solutions Consultancy
Proposes solutions upon understanding clients' pain points and requirements, including exploring new technology solutions to meet varying project complexity.

Enterprise Service Delivery
Works closely with consultants to present proof of concept and for delivery of proposed solutions.

Managed Services
Provides thorough support for contract clients and ad hoc services.

From implementation and integration services to disaster recovery, ZS has the right expertise and Zealos to address IT needs of companies big and small.

OUR SERVICES

OUR SERVICES

Implementation and Integration Services

With no doubt, data and communication solutions for businesses have gotten more complex as their capabilities have multiplied by folds too. However, this does not mean that your IT implementation and integration efforts get more complicated too. ZS follows a thorough and proven systematic approach during implementation so that you can rest assured that the projects will be delivered as promised and with ease of mind.

Managed Operations Services

Do you find it a challenge to manage IT internally? Consider IT as a Service (or ITaaS) business model so that you can get going with your real business while we take care of your IT business. The ITaaS is not limited to or dependent on cloud computing but instead, is enabled by underlying technology models such as Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS). Managed services thus become a part of ITaaS business model.

OUR SERVICES

Enterprise Architecture

Time wasted in misalignments and miscommunications with internal and external stakeholders is money wasted. In this age of hyper-connectivity and rapid competition, enterprises big and small have no resource to waste on fragmented and silo mentality in the business environment. The goal of enterprise architecture is to create unity in information sharing, in an effort for synergistic communication and collaboration, creating a more seamless customer (or end-user) experience.

Cloud Computing

In the past, there used to be a spectrum of IT capabilities that only the big and wealthy can afford to execute. With cloud computing, things have changed for the better, for both the small and big players. Software and services can now be subscribed and paid for on monthly basis, like utility services. Everything is accessible from the "cloud" so that you can carry out your business anytime, anywhere.

OUR SERVICES

Network Security

The organisation's network is like other physical assets that you have in the company; you want to makes sure they are secured 24/7. Increasing network security decreases the chance of privacy spoofing, identity or information theft and many other vulnerabilities that your network is exposed to. Backup isn't enough; proactive prevention is a necessity to minimize risk of network security breach.

Data Security

What happens when data is accidentally deleted? What happens when data is deleted against the company's consent? Are you capable of restoring the data to its original state? Securing your data or having online backup solution can save your company and business a lot of troubles and valuable resources. For extra precaution, ZS practises offsite data backup as well. After all, nothing is more important than data so it's better to be safe than sorry.

Disaster Recovery

Disasters are sudden events, such as an accident or natural catastrophes, that cause great damage. Just like buying an insurance, you'd want to get a comprehensive and trusty disaster recovery plan so that your business can rebound as best and quick as possible to minimize loss. Have a disaster recovery plan so that you can expect business to continue when the unexpected happens.

OUR CLIENTELE

Zealotech Solution (ZS) boasts a wide range of clients to validate our expertise in delivering IT solutions that work across various industries, even in complex industries like Financial, Manufacturing, Education and Healthcare.

IT solutions for Financial Industry

Financial service companies are constantly pressured to improve IT infrastructures and systems to meet the increasing scrutiny of legal regulations and requirements, especially in the area of data security, without compromising on profitability. To achieve business requirements while managing IT cost efficiency, we make these financial players more agile by modernizing their technology infrastructure and automating business processes for increased efficiency.

IT solutions for Manufacturing Industry

The manufacturing industry is not immune to the global economic challenges. As a matter of fact, local manufacturing companies are getting some of the hardest hits due to increased competition from multinational companies. In order to regain competitiveness, IT professionals in manufacturing sector are expected to achieve better operational integration with their customers and suppliers. ZS has been privileged to have worked with some of the leading manufacturing companies around in order to devise proven yet flexible IT solutions for the manufacturing industry. Our long-term working relationship with many industry players ensures we

OUR CLIENTELE

IT solutions
for Education Industry

With the advancement in technology, educators are leveraging on continuous improvement for the best learning delivery via smart yet affordable IT solutions. Education is a life-long process. When it comes to educating the future generations, planning and implementing these new enabling technologies becomes a heavy responsibility and is often seen as an overwhelming task. ZS is a chosen and proven solution integrator in the educational industry for this task. We help learning institutions deploy new collaboration, communication, and learning tools with ease of mind while achieving a strategic advantage. For institutions with aging infrastructure, we take care of upgrade and maintenance as well. On top of that, ZS also has expertise in safety and security management for single building, multi-complex or campus-wide.

IT solutions
for Healthcare Industry

Communication plays a key role in healthcare delivery; unified communication between healthcare providers and patients are important to ensure the right patient care is given. With the help of technology, healthcare professionals are able to transmit patient information more clearly, efficiently and safely to facilitate the best patient care. ZS comes in to fill the gap in communication and data management systems with easy-to-use solutions that ease the jobs of healthcare providers and allow them to focus on delivering quality healthcare services.
